3D PRINTER POLICY

Board Approved: 2/14/19

The Community Library Network offers cardholders the ability to print three-dimensional plastic items on our 3D printers using a design uploaded from a digital computer file.

When using our service, please be aware that:

1. Only filament supplied by the library can be used.
2. Cost for the print will be assessed per each gram of filament. You will know how much the project is going to cost before it is submitted.
3. You can only use the 3D printer for lawful purposes. A print will be refused if the object would:
 - a. Be prohibited by local, state or federal law
 - b. Be construed as having intent or capability to harm a person or animal
 - c. Infringe upon the intellectual property rights of a third party
 - d. Be larger than 10" x 6" x 6.7"
4. Only one print job may be in the queue at a time. A print job may include more than one object.
5. All completed items must be paid in full. We will not reprint a project at no-cost because you are unhappy with the color, quality, design, or other options you pre-selected.
6. We can hold your printed items for two weeks. Items not picked up will become property of the library.
7. We reserve the right to refuse or deny any 3D printing request.
8. By submitting objects for printing, you assume responsibility for all matters related to patented, trademarked, or copyrighted materials.
